

THE CHANGING LONDON SKYLINE TIMELINE

To show how the London skyline has changed over the years, create a chronological timeline of as many London attractions and landmarks as you can, based on the year they were built. Start with the oldest, working up to the most recent to open its doors!

The form consists of two parallel horizontal blue lines, each with six evenly spaced dots. Vertical lines connect the dots on the top line to the dots on the bottom line. This creates a series of rectangular sections. Above the top line, there are three empty rectangular boxes, each connected to a dot by a vertical line. Below the top line, there are three empty rectangular boxes, each connected to a dot by a vertical line. Similarly, above the bottom line, there are three empty rectangular boxes, each connected to a dot by a vertical line. Below the bottom line, there are three empty rectangular boxes, each connected to a dot by a vertical line. The entire structure is enclosed in a blue border that follows the path of the lines and dots.
